

Courtesy Launch

**Can't find that specialty wrench to put your dock together?
You won't need one with Superdeck.**

Our modular components are patented to optimize longevity, but they don't have to be assembled with any fancy wrenches. Common size stainless steel fasteners and standard tools make assembly a snap.

The installation of Superdeck's courtesy launch is simple; you can do it yourself or hire it out if you don't have time. Either way, you'll save time and money because you won't need any heavy machinery to lift the pieces into place. Superdeck floats weigh from 60-120 pounds and the various sized decking components weight 30 to 128 pounds. Lifting and assembly is manageable for two people so you can install Superdeck on-site in places motorized equipment may not be able to reach without impacting the environment.

The distinct advantages of the Superdeck system make it the first choice for dock owners who are tired of the headaches associated with conventional dock materials. Whether for public or private use, Superdeck excels for dock and boat launch applications. Superdeck's amazing flex strength can survive virtually any kind of hit or abuse, it doesn't need bumpers, and it's impervious to gasoline and oil spills. Need a boat dock that can stand up to years of heavy use? Look to Superdeck and avoid the headaches associated with conventional dock materials.

Your boat dock can benefit from these exclusive Superdeck features:

- Five foot wide panels easily accommodate wheelchairs to pass and turn
- Patented floats allow water as well as plant, animal and aquatic life to pass underneath
- Impervious to gas and oil spills
- Suitable for piling, pole or deadweight anchorage
- Railing systems available in wood, galvanized steel or aluminum
- Low-maintenance, no-bounce, non-skid surface
- Color-stabilized polyethylene material won't split, splinter, nail-pop, or rot
- No costly or heavy machinery required for installation
- Three deck and float widths (24", 42" 60") available
- Complies with ADA, DNR, US Army Corp of Engineers and Coast Guard requirements

Take advantage of these Superdeck offers:

- ☑ Ready to get started? Call 1-800-355-4093 today and speak with our Engineering Design Team. Qualified leads receive a detailed product design, product load characteristics and engineering specifications within 48 hours!
- ☑ Need more information before you speak to our Design Team? Call us at 1-800-355-4093 or send an e-mail with your mail address to info@superdecksystems.com. We'll send you a **FREE** 16 page "Universal Access Design Kit." It includes detailed product design information and engineering specifications to help assess your current project needs.
