

# Nature Trail

## Required to meet tough DNR restrictions for nature trails? Superdeck's non-permanent, modular structure provides environmentally-friendly access.

Public demand for nature trails continues to grow. Taking people where they want to go, especially when it means providing access to sensitive wetland areas such as marshes and bogs means balancing public demand with environmental protection.

Superdeck is uniquely designed to provide access to these sensitive areas. And, the DNR likes the inert material and unobtrusive structure that SuperDeck offers. Equally at home in wetlands, bogs, sand dunes, and marshes, Superdeck provides an excellent base for observation decks, especially in remote areas where installation and maintenance of traditional decking can be costly and difficult.

Superdeck's nature boardwalks are easy to move to new configurations to accommodate changes in season or programs. Designed to be environmentally safe, Superdeck minimizes any disruption to plant, animal and aquatic life. When you need a nature trail that doesn't obstruct water or wildlife movement, think Superdeck. The unique modular design of Superdeck's deck panels and floatation devices won't adversely impact natural flora, fauna and wildlife.

Your nature trail can benefit from these exclusive Superdeck features:

- Five foot wide panels which easily accommodate wheelchairs to pass and turn
- Low-maintenance, no-bounce, non-skid surface
- Flexible design for strength and durability
- Color-stabilized polyethylene material won't split, splinter, nail-pop, or rot
- Modular system for quick and easy installation with standard tools
- No costly or heavy machinery required for installation
- Several widths (24", 42" 60"), anchoring and railing options available
- Proven track record of superior performance
- Additional patented floatation can be incorporated to take trail over water
- Complies with ADA, DNR, US Army Corp of Engineers and Coast Guard requirements

### Take advantage of these Superdeck offers:

- Ready to get started? Call 1-800-355-4093 today and speak with our Engineering Design Team. Qualified leads receive a detailed product design, product load characteristics and engineering specifications within 48 hours!
- Need more information before you speak to our Design Team? Call us at 1-800-355-4093 or send an e-mail with your mail address to [info@superdecksystems.com](mailto:info@superdecksystems.com). We'll send you a **FREE** 16 page "Universal Access Design Kit." It includes detailed product design information and engineering specifications to help assess your current project needs.
