

# Simple Installation

**Did you enjoyed putting together those little building blocks as a Kid? You'll really appreciate the simplicity of SuperDeck's modular design.**

Our modular design is engineered for simplicity with assembly instructions that are easy to understand. The installation of the components is simple so you can do it yourself or hire it out if you don't have time. Either way, you'll have time and or money because you don't need any complex machinery to lift the pieces into place. SuperDeck® floats weigh from 60-120 pounds and the various decking sizes weight 30 – 128 pounds. Lifting and assembling any deck or dock is certainly manageable for two people and requires no heavy equipment, which can be an expensive additional cost. This is a key differentiator versus heavy docks and decks products made by other companies.

SuperDeck also decided to use common fasteners such as standard size bolts and nuts so you can use a standard set of wrenches for assembly. Superdeck goes from land to water easily. You can use the same Superdeck panels to provide access along the waterfront and across the water. Non-skid Superdeck panels produce continuous, secure passageways that can accommodate wheelchairs (even the heavy motorized ones), strollers, wagons, carts, pedestrians and pets. Unlike temporary fabric panels, rigid Superdeck panels won't shift, wrinkle or become impassable from wind and weather. Superdeck's unique modular components install easily with standard tools. There's no need for expensive or potentially damaging heavy machinery.

Superdeck's durable polyethylene construction eliminates splits, splinters, nail-pops, rotting, and warping and is backed by a five-year limited warranty. For 21 years, Superdeck has been a leading innovator in developing unique solutions to the toughest public access problems. Select Superdeck to protect the environment, preserve public safety, maximize accessibility and enhance your outdoor experience.

Your simple installation is just one of the benefits from Superdeck:

- Five foot wide panels which easily accommodate wheelchairs to pass and turn
- Low-maintenance, no-bounce, non-skid surface
- Flexible design for strength and durability
- Color-stabilized polyethylene material won't split, splinter, nail-pop, or rot
- Modular system for quick and easy installation with standard tools
- Several widths (24", 42" 60"), anchoring and railing options available
- Complies with ADA, DNR, US Army Corp of Engineers and Coast Guard requirements
- Proven track record of superior performance

## Take advantage of these Superdeck offers:

- Ready to get started? Call 1-800-355-4093 today and speak with our Engineering Design Team. Qualified leads receive a detailed product design, product load characteristics and engineering specifications within 48 hours!
- Need more information before you speak to our Design Team? Call us at 1-800-355-4093 or send an e-mail with your mail address to [info@superdecksystems.com](mailto:info@superdecksystems.com). We'll send you a **FREE** 16 page "Universal Access Design Kit." It includes detailed product design information and engineering specifications to help assess your current project needs.
