

Swim Platform

Need to design an aesthetically pleasing and secure swim platform? Start with Superdeck's patented deck and floats.

We've all seen them – swim platforms cobbled together from stinky, rusty steel drums or flimsy foam blocks. Not only an eyesore, but a real liability nightmare.

Swimming platforms can be tons of fun for children and adults alike. But, swim platforms can also be a serious concern if made from the wrong materials. Some floating systems use steel drums that can rust, leak and sink. Others rely on unclad foam blocks that can crumble and tempt birds and rodents to gnaw. With Superdeck, you can avoid these all-too-common problems.

First, Superdeck provides a stable base so the platform won't tip over when the weight of people on the platform isn't equally distributed. Second, Superdeck delivers a high freeboard, meaning the platform sits high in the water which allows it to ride above the waves and be much more visible to boats and watercraft. In fact, Superdeck platforms are such a natural choice, they're currently in use for educational research and entertainment performances with Orca whales and other wildlife. Superdeck's Universal Access Team can help you determine which configuration, including ladders, railing and anchoring options will best fit your needs.

Your swim platform can benefit from these exclusive Superdeck features:

- Patented floats allow water as well as plant, animal and aquatic life to pass underneath
- Suitable for piling, pole or deadweight anchorage
- Low-maintenance, no-bounce, non-skid surface
- Color-stabilized polyethylene material won't split, splinter, nail-pop, or rot
- No need for painting, staining or sealing!
- Railing systems available in wood, galvanized steel or aluminum
- Assembles easily with standard tools.
- Three deck and float widths (24", 42" 60") available
- Complies with ADA, DNR, US Army Corp of Engineers and Coast Guard requirements

Take advantage of these Superdeck offers:

- Ready to get started? Call 1-800-355-4093 today and speak with our Engineering Design Team. Qualified leads receive a detailed product design, product load characteristics and engineering specifications within 48 hours!
- Need more information before you speak to our Design Team? Call us at 1-800-355-4093 or send an e-mail with your mail address to info@superdecksystems.com. We'll send you a **FREE** 16 page "Universal Access Design Kit." It includes detailed product design information and engineering specifications to help assess your current project needs.
