

Walking Path

Need a flexible trail system that can adapt as your program changes? Superdeck's modular system installs, expands and stores easily.

Seasons, funding levels, and public interest – inevitably, they all change with time. With Superdeck, you can install, move and store your public access trail without hassle. And, Superdeck goes from land to water easily. You can use the same Superdeck panels to provide access on land and across water. Need to provide hassle-free, ADA-compliant public access? Superdeck's low-maintenance decking provides a firm, secure surface over virtually any terrain.

Wood chips, rock, asphalt, and wood board, we know these to be traditional tools of the landscape trade. Often, these quick and dirty options stick us with long-term drawbacks such as rotting, splintering, nail pop, warping, and edge crumble. Patching and filling can turn what was thought to be a quick fix into high-maintenance disaster. As a result, park and landscape professionals have spearheaded a move to long life, low maintenance products like Superdeck. Hassle-free from start to finish, Superdeck delights public, private and commercial clients who report significant long-term savings from Superdeck's reduced maintenance and repair. Superdeck's modular components are patented to optimize longevity, but they don't have to be assembled with any fancy wrenches. Common size stainless steel fasteners and standard tools make assembly a snap.

Your walking path can benefit from Superdeck's:

- Five foot wide panels easily accommodate wheelchairs to pass and turn
- Patented floats allow water as well as plant, animal and aquatic life to pass underneath
- Low-maintenance, no-bounce, non-skid surface
- Color-stabilized polyethylene material won't split, splinter, nail-pop, or rot
- Modular system for quick and easy installation with standard tools
- No costly or heavy machinery required for installation
- Several widths (24", 42" 60"), anchoring and railing options available
- Complies with ADA, DNR, US Army Corp of Engineers and Coast Guard requirements
- Proven track record of superior performance

Take advantage of these Superdeck offers:

- Ready to get started? Call 1-800-355-4093 today and speak with our Engineering Design Team. Qualified leads receive a detailed product design, product load characteristics and engineering specifications within 48 hours!
- Need more information before you speak to our Design Team? Call us at 1-800-355-4093 or send an e-mail with your mail address to info@superdecksystems.com. We'll send you a **FREE** 16 page "Universal Access Design Kit." It includes detailed product design information and engineering specifications to help assess your current project needs.
